JX Advanced Metals Corporation

JX Advanced Metals Receives the 2024 TSMC Excellent Performance Award

JX Advanced Metals Corporation (President: Hayashi Yoichi; “the Company”) received the 2024 TSMC Excellent Performance Award from Taiwan Semiconductor Manufacturing Co., Ltd. (CEO: Che Chia Wei; “TSMC”).

The Company was praised for its support regarding materials for the research and development of cutting-edge semiconductor devices; its support in relation to quality, technical aspects, and sales, centered on everyday technical proposals and improvements for mass-produced devices; and its stable supply system based on agile expansion of production capacity adapted to TSMC’s production site expansion. The Company believes this award is the result of the concerted efforts of its group, including its local subsidiary in Taiwan.

At the award ceremony held on December 2, Dr. Wei expressed his gratitude, saying that the groundbreaking technological breakthroughs of TSMC’s suppliers are essential to its role in creating an innovative world as the industry leader and TSMC is thankful to its award-winning suppliers for their precious support.

As a global supplier of semiconductor materials, the Company has contributed to the growth of the semiconductor industry for over 30 years by continuously providing materials to its cutting-edge customers.

The Company aims to become a global leader in semiconductor and ICT materials and will contribute to sustainable development and innovation within society in collaboration with its customers through the development and supply of highly functional advanced materials.
