## **JX Advanced Metals Corporation Receives the 2025 Best Partner Award from SK hynix Inc.**

JX Advanced Metals Corporation (President: Hayashi Yoichi, hereinafter “the Company”) has been honored with the Best Partner Award from SK hynix Inc. (CEO: Kwak Noh-Jung, hereinafter “SK hynix”), a leading semiconductor manufacturer based in South Korea. This award is presented to outstanding suppliers who have made significant contributions to SK hynix’s development and manufacturing goals.

SK hynix is one of the world’s top memory semiconductor manufacturers. In response to the rapid expansion of generative AI, it is meeting the growing demand for advanced semiconductors essential to AI data centers. In particular, SK hynix has established a strong global presence in the market for high-bandwidth memory (HBM), which enables faster and more energy-efficient data processing compared to conventional memory.

The Company’s sputtering targets for semiconductors are used as wiring materials in HBM and play a vital role in supporting the development and production of SK hynix’s latest generation of products.

This award recognizes the Company’s reliable support in the stable supply of sputtering targets for memory semiconductors. We believe this achievement is the result of a unified effort across all locations of the JX Group, including our local subsidiary in South Korea.

As a global supplier of semiconductor materials, the Company has contributed to the growth of the semiconductor industry for over 30 years by continuously providing cutting-edge materials to leading customers. Moving forward, we will continue to strengthen our partnerships with semiconductor manufacturers such as SK hynix and contribute to technological innovation and the development of a sustainable society through the development and stable supply of high-performance, high-functionality advanced materials.
